The first comprehensive  
exhibition of contemporary  
Palestinian art in the U.S.

*Made In Palestine* on view at SomArts, San Francisco,  
April 7 through April 21, 2005. The exhibition  
showcases a collection of contemporary art made by  
23 Palestinian artists and refugees, who live in the  
occupied territories and the Diaspora. The works  
on display cover a wide range of media and present  
individual reflections on the Palestinian contempo-  
rary experience and the political situation in  
Palestine. The Station Museum, Houston, where  
the show originated, described *Made In Palestine* as  
"the first exhibit of contemporary Palestinian  
art ever displayed in the United States." For more  
information, go to [www.stationmuseum.com](http://www.stationmuseum.com) or
